About Artificial Solutions International AB

Artificial Solutions (SSME:ASAI) is the leading specialist in enterprise-strength conversational AI, a type of artificial intelligence that enables people to communicate with applications, websites and internet-connected devices in a human-like manner through voice, text, touch or gesture interaction.

The Company's advanced AI platform, Teneo, makes it possible for larger global corporations to collaborate with developers and together create sophisticated and highly intelligent conversational AI applications that runs over 35 languages, on multiple platforms and communication channels. The ability to analyze and benefit from the huge amount of conversation data is completely integrated into Teneo, which allows for unmatched insight into the customers' behaviors.

Artificial Solutions' technology for conversational AI makes it easy to implement a wide spectrum of applications with natural language, such as virtual assistants, chatbots, voice-based conversational interfaces for smart devices, and more. The technology is already used by millions of people today in hundreds of implementations within both the public and private sector globally.
